- ▶ Ouranos supplies a full holistic solution to every project satisfying the individual needs of each client and incorporating the state-of-the-art equipment from the worlds leading manufactures.

WORK METHODOLOGY;

1. Evaluate

- ▶ Our expert sales team ascertains and understands your business requirements through a free initial consultation.
- ▶ We then match these requirements against our quality products and services, and hand-pick the components that form the best solution for your business in terms of both technical ability and value for money.
- ▶ Once a tailor-made solution is established, we will contact you to confirm the assessment criteria.

2. Proposal

- ▶ We form a free written proposal that includes your business requirements and the unique solution that best fulfills them. We then demonstrate the solution to you, provide you with relevant references and invite your questions so that an agreement can be reached.

3. Pre-delivery

- ▶ When you decide Ouranos is the solution for you, we assign you a committed project manager to conduct a site survey. We create design and programming specifications unique to your business needs.

4. Delivery

- ▶ Once ready for delivery, our skilled and experienced installation team implement your solution in accordance with your design and programming specifications with the minimum of disruption to your activities.
- ▶ We then test to ensure your solution is working at full capacity.
- ▶ Once your solution is fully functional we provide on-site training alongside user guides before signing off your project.

5. Support

- ▶ Our knowledgeable staff at the Ouranos support desk is available to take any queries you may have, as well as assist you with any support and configuration, and on-site assistance if necessary.
